Amplifier Installation Guide - 3 Star Inc. Virginia

Attach the blue wire to the remote input port of the amplifier. Locate the terminal on the back of the amp that says "Remote" or "Turn-on" for the blue wire. Place the end of the blue wire into the terminal and screw it down so you can't pull the wire out. Make sure none of the exposed wires sticks out from the terminal.

How to Install a Car Amp - wikiHow

Whenever a circuit is extended or rewired, or when any new circuit is installed, it is critical that the new wiring is made with wire conductors that are properly sized for the amperage rating of the circuit. The higher the amperage rating of the circuit, the larger the wires need to be in order to avoid excess heat that can melt wires and cause fires.

Matching Wire Size to Circuit Amperage - The Spruce

Input Wiring Connections Night Ringer Connection Either a standard telephone (analog) ring signal (90 - 105V AC, 20 - 30 Hz) or an external contact closure activates the night ringer function of the amplifier. To activate the night ringer using standard telephone (analog) ring, connect the analog station's tip lead to the TEL RING "T"...
