Chapter 14: The Brain and Cranial Nerves study guide ...

Cranial nerves are nerves of the PNS that originate from or terminate in the brain. There are 12 pairs of cranial nerves, all of which pass through foramina of the skull. Some cranial nerves are sensory nerves (containing only sensory fibers), some are motor nerves (containing only motor fibers), and some are mixed nerves (containing a combination of sensory and motor nerves).

While the human body contains more than 1 billion neurons that form the spinal cord, brain and nerves, there are 12 pairs of nerves found arising directly from the brain (not the spinal cord, which is the origin point of many nerves). These 12 nerves are called cranial nerves and they serve as some of the most important nerves in the body, controlling movement, heart rate, senses and more.
