Isuzu OBD I Diagnostic Trouble Codes| Retrieve and Repair

The Isuzu engine ECM (engine control module) will signal the generator operator of an engine fault via a FLASH CODE at the warning lamp on the control panel. This flash code will allow the service technician to determine the cause of error or shutdown. Once the repair is made, under normal circumstances the fault code is cleared after 20 start-stop cycles of the unit. In the event a code does not clear or the engine
