Solutions manual to Calculus: An intuitive and physical ...

This gives $k = ah'' + bh' + c$, and in view of the value of h , $k = (4ac - b^2)/4a$. The new equation becomes $y' = ax''$ which is of the form $y = x^2/4p$ with $a = 1/4p$. (b) The focus of $y = x^2/4p$ is at $(0,p)$ or for the equation $y' = ax^2$ at $(0,1/4a)$. The translation determined in (a)'s $x = x' - b/2a$, $y = y' + (4ac - b^2)/4a$.

Calculus: An Intuitive and Physical Approach (Second ...

Morris Kline: Mathematics for the Masses Morris Kline (1908–1992) had a strong and forceful personality which he brought both to his position as Professor at New York University from 1952 until his retirement in 1975, and to his role as the driving force behind Dover's mathematics reprint program for even longer, from the 1950s until just a few years before his death.

Mathematics for the Nonmathematician by Morris Kline ...

Application-oriented introduction relates the subject as closely as possible to science. In-depth explorations of the derivative, the differentiation and integration of the powers of x , theorems on differentiation and antidifferentiation, the chain rule and examinations of trigonometric functions, logarithmic and exponential functions, techniques of integration, polar coordinates, much more.

Morris Kline Solutions Manual

You picked a great book. I love that book. It's my second favorite American calculus book from the last 50 years (Peter Lax's book being my favorite, and Piskunov's being my favorite Russian calculus book).What these books all have in common is taking the approach that calculus is a part of science, and of physics in particular.

This books at times feels deep, like the philosophy of calculus in addition to a howto, not just a perfunctory, dry how-to. Kline provides realistic examples and focus attention on scientific and practical uses of calculus: eg motion down a inclined plain, projectiles, etc.
