The 60-km-long island of Lanzarote at the NE end of the Canary Islands contains the largest concentration of youthful volcanism in the Canaries. Pleistocene-and-Holocene cinder cones and lava flows erupted along NE-SW fissures are found throughout the low-altitude arid island and on smaller islands to the north. The largest historical eruption of the Canary Islands took place during 1730-36 ...

Timanfaya National Park, Lanzarote. A visit to the Timanfaya National Park is a must for every visitor to Lanzarote. The spectacular volcanic landscape, that covers a quarter of the island, was created over six years of near-continuous volcanic eruptions that took place between 1730 and 1736, with a smaller episode in 1824.

Lanzarote is different than other sun and sea destinations. It's an island where nature and art prevail. A place where the people are as warm as they are active and proud. Where the food tastes of the sea and the earth. Where the essence of the island leaves a mark on your soul long after you depart. That's The Lanzarote Effect.
