It is practically impossible to make sense of data sets containing more than a handful of data points without the help of computer programs.

Making Sense of Data I - DropPDF
Data Science: making sense of data. Written by PHASTAR on 01 November 2019. Posted in Blog. The volume of digital data in healthcare is projected to increase more rapidly in the coming years than any other sector. On a day-to-day basis it is vital that clinical teams ensure they are maximising the value, not only of their own trial data but also of the wealth of external data for example electronic healthcare records, real-world data and peer-reviewed research published in journals.

Data Science: making sense of data - PHASTAR
Our technologies affect not only how we "make sense" but also what we mean by "making sense." The proliferation of sensors, smart-connected products (Internet of Things), the measurements they generate (big data), on-demand computing (the cloud), and pattern-finding software (AI) are changing how individuals and organizations interact.

Making sense in the data economy - dubberly.com

Making Sense of Data: How Much Do You Need? | Verizon Wireless
Sensemaking or sense-making is the process by which people give meaning to their collective experiences. It has been defined as "the ongoing retrospective development of plausible images that rationalize what people are doing" (Weick, Sutcliffe, & Obstfeld, 2005, p. 409).The concept was

introduced to organizational studies by Karl E. Weick in the 1970s and has affected both theory and practice.

Sensemaking - Wikipedia

Data-driven decision making, applied to student achievement testing data, is a central focus of many school and district reform efforts. Yet many unanswered questions remain about the use of data to inform decisions and the effects on student achievement.
