RMA Publishes Revised Tire Replacement Guidelines ...
Tire Business Staff. WASHINGTON (April 6, 2011) — The Rubber Manufacturers Association (RMA) is offering its industry guidelines for passenger and light truck tire repair in a free downloadable format from its website. The information is available as a wall chart or a step-by-step powerpoint presentation, the RMA said, along with a consumer information sheet and a short video on the importance of proper tire repair.

Professional Tire Repair A complete inspection and repair of your tire in accordance with Rubber Manufacturers Association (RMA) procedures should be conducted by a qualified tire service professional. A proper tire repair includes the following: The tire is demounted from the wheel for a complete inspection, inside and out.

Rma Tire Repair Guidelines - mail.trempealeau.net
Since RMA guidelines reflect a unanimous consensus among the tire companies, they are virtually indisputable from a legal perspective. As far as commercial tire dealers are concerned, the only type of repair that can be installed in the field is referred to as a puncture, or nail hole, repair.

Knowing what not to repair - Modern Tire Dealer
Tires must be removed from the rim/wheel assembly and inspected for all possible damage—including damage to the inner liner. Tire repairs cannot overlap with other repairs. A rubber stem, or plug, must be applied to fill the puncture injury and a patch must be applied to seal the inner liner. (A plug alone is an unacceptable repair.)

Tire Repair Basics | U.S. Tire Manufacturers Association
To prevent contamination and preserve the outline, buff within the marked area thoroughly and evenly with a low speed buffer (5,000 rpm max.) with a fine wire brush or gritted rasp. Take care not to expose or damage tire casing body (ply) cords. Buff to a velvet surface; RMA No. 1 or No. 2 texture4.

PUNCTURE REPAIR PROCEDURES FOR PASSENGER AND LIGHT TRUCK TIRES
To safely repair your tire, the puncture must be 1/2 inch away or more from the edge of the tire tread where the internal steel belt begins. Any puncture less than 1/2 inch from the start of the internal steel belt on the shoulder or sidewall of the tire cannot be repaired (shown in the red area of the diagram).

Flat Tire Repair Guidelines
Never repair tires with a tread puncture larger than ¼-inch (6mm). Tires that are worn to the tire's treadwear indicators or to 2/32-inch remaining tread depth in any area of the tread should not be repaired. Not all tires can be repaired.

Tire Repair | TIRE INDUSTRY ASSOCIATION
outcome from a prior negative experience. If someone chooses not to run repaired tires on a steer axle, that is a fleet spec, not a law. If section repairs are not permitted on drive tires, it is a fleet spec, not a law. There is a move by the RMA to legislate what would be an "improper repair", but so far this has not

Laws Regulating Tire Repair in the United States
"Despite years of effort by tire manufacturers, tire dealer organizations and tire repair materials manufacturers to educate repair shops about proper repair, too many improper repairs are performed. RMA supports these bills and urges New York legislators to enact this legislation," Zielinski said at the time the bills were introduced.

Tire Repair Law in N.Y. Dead, RMA to Continue Push - Tire ...
individual tire is suitable for repair or should be removed from service. National tire industry standards for the U.S. and Canada are defined and published by the Rubber Manufacturers Association (RMA) . The RMA sets out these standards in a wallchart which can be located at www.rma.org. Extracts from the RMA wallchart are as follows: WARNING: Improperly repaired tires can fail while in service, such as by tread-

Tire Repair for Passenger Car and Light Truck Tires
Use an electric/air powered drill (1,200 rpm max.) with an appropriate size carbide cutter or other suitable tool. Beginning from the inside, ream the puncture channel a minimum of three times—repeat from the outside. Use a probe to check for any splits in the radial plies surrounding the injury.

Product Service Bulletin - Goodyear.com
(Tire care and service manuals are available from RMA on its website, www.rma.org.) Tires should be removed from service for several reasons, including tread worn down to minimum depth, signs of damage (cuts, cracks, bulges, vibration, etc.) or signs of abuse (under inflation, overloading, etc.).

RUBBER MANUFACTURERS ASSOCIATION Tire Service Life for ...
Specific repair limits should be based on recommendations or repair policy of the tire manufacturer and/or type of tire service. NEVER repair a tire that has an existing, improper repair; the tire must be scrapped. A plug by itself or a patch by itself is an unacceptable repair. NEVER perform an outside-in tire repair or on-the-wheel repair.

Proper Tire Repair | Sullivan Tire & Auto Service
They stood firm and said that it is repairable, and are unable to replace the tire under the terms of the road hazard warranty. According to the RMA document, this puncture should not be repaired. While the repair will probably be safe for street use, I am not in agreement with their position.

Got a Flat -- RMA Repair Guidelines? - Bob Is The Oil Guy
Industry standard guidelines permit tire repair shops to fix punctures in a tire's tread area that are up to ¼ inch in diameter. Repairing anything larger is not recommended.
