Chris Jones is a Site Reliability Engineer for Google App Engine, a cloud platform-as-a-service product serving over 28 billion requests per day. Based in San Francisco, he has previously been responsible for the care and feeding of Google's advertising statistics, data warehousing, and customer support systems.

Site Reliability Engineering: How Google Runs Production ...

Abstract. The overwhelming majority of a software system's lifespan is spent in use, not in design or implementation. So, why does conventional wisdom insist that software engineers focus primarily on the design and development of large-scale computing systems? In this collection of essays and articles, key members of Google's Site Reliability Team explain how and why their commitment to the entire lifecycle has enabled the company to successfully build, deploy, monitor, and maintain ...
