### The Man Who Tasted Shapes

The Man Who Tasted Shapes is an extraordinary work of research into the human mind that was, to me, only superficially about synesthesia. The information and perspective shared are much bigger than the title would imply. I believe that you'll find it to be fabulously interesting, even if you have zero interest in synesthesia.

Imagine a world of salty visions and square tastes. Although a minority of people experience the world this way, neurologist Richard Cytowic shows how the phenomenon of synesthesia sheds light on how all human brains function. For 200 years synesthesia had confounded science. Now Dr. Cytowic tells the stories of extraordinary individuals and relates how a decade of experiments led him to conclude that all of us perceive synesthetically, but that the ability is usually hidden from conscious ...
