Only slightly less famous than "No Silver Bullet" is another Brook's paper, "The Mythical Man Month". The papers are no less valid today than they were when written, but they receive a lot less attention. In "The Mythical Man Month" Brooks argues that adding people to a project doesn't speed it up.

Hence the man-month as a unit for measuring the size of a job is a dangerous and deceptive myth. It implies that men and months are interchangeable. When a task cannot be partitioned because of sequential constraints, the application of more effort has no effect on the schedule. The bearing of a child takes nine months, no matter how many women are assigned.

The contention in the Mythical Man-Month is that as you add folks to a software project, the communication needs to increase geometrically. For example, if you have 3 people on the project, that's 3 lines of communication. But if you have 4, that's 6 lines of communication. One extra person, in this case, leads to double the communication!
