Infertility sucks: 12 strategies for surviving infertility Nathan and I took just under 3.5 years to get pregnant, that's 3 years 6 months and 17 days or 1291 days. When I write it like that, I realise just how long that really is.

Infertility sucks: 12 strategies for surviving infertility ...

Every IVF journey is different and so is the pain that comes with a failed IVF cycle. I don't expect someone who has children, who is pregnant or is blessed with no fertility issues to fully understand the pain that is attached to infertility. If you don't suffer from infertility it can be hard to understand the magnitude of mixed emotions.

When IVF fails : feminism, infertility, and the ...

Our IVF cycle had failed. Approximately 12 percent of women in the U.S. between ages 15 and 44 experience infertility, defined as the inability to conceive after 12 months of regular sexual intercourse. If you are older than 35, the timeline used to diagnose infertility is much shorter — six months of timed intercourse. The inability to reproduce can be extremely distressing in and of itself, and my experience has been no exception.
